

Quantic™ Wenzel

EMPLOYEE SUCCESS STORY

Nicholas Tiches
RF Engineer

Nicholas joined the Quantic Wenzel engineering team in May 2022, relocating to Texas from his home state of Maryland. Since joining, Nicholas has made significant strides in advancing his RF engineering expertise and contributions to the Quantic Wenzel team. His work encompasses prototyping, design, and testing to support both new and existing products, particularly those with Phase-locked loop's and digital circuits. Nicholas attributes his success to the close support he received during his initial days and months at the company from his colleagues, including Patrick Mullin, Mehran Moss, Fran Crea, and Richard Koehler. Nicholas is a firm believer in pushing boundaries and taking calculated risks when finding solutions to tough engineering problems. He believes this approach is critical for achieving new standards of performance while helping our customers solve their most pressing challenges. Outside of work, Nicholas enjoys playing pool with friends, snow skiing, and traditional Greek folk dancing. We're thankful to have bright and passionate engineers like Nicholas on our team, and we look forward to his continued growth and success with the company!

“

I have learned that taking calculated risks and stepping outside my comfort zone is crucial to my growth, both in engineering and in life. Learning from my failures and successes has led me to opportunities I once thought I never could have attained.

-Nicholas Tiches
